Group:OpenOfficeExtensions/List

< Group:OpenOfficeExtensions

This is the start of an all-free-software list of extensions for both OpenOffice.org and LibreOffice.

The official OpenOffice.org extensions repository offers many addons to extend OpenOffice.org with additional features.

While OpenOffice.org is free software, it has a policy of also listing proprietary extensions in with the free software ones.

LibreOffice uses this extension library by default, so it doesn't have the problem with recommending nonfree add-ons. They have launched a public beta of their own extensions repository at <http://extensions-test.libreoffice.org/>.

Please see [Group:OpenOfficeExtensions](#) for more information about the listing, how use it, and how to contribute.

extensions.libreoffice.org

Sort by different criteria.

Name	Description	License	Version of the extension when it was reviewed
AddPics	AddPics creates a text document from pictures of scanned documents with the correct page orientation (portrait or landscape) for each page of document.	LGPLv3	2.3.1
Afrikaans spell checker	Afrikaans spell checker	LGPLv3	2008.07.01
Alba	Simplifies the creation of documents with mixed orientation	LGPL (no version specified)	1.4.6
Alternative Find & Replace for Writer	Adds many new features to Writer's find & replace function	LGPLv2.1+	1.3.2
Anaphraseus	Anaphraseus is a CAT (Computer Aided Translation) tool, an OpenOffice.org 2 machine translation system that translates text from one language to the famous Wordfast. It works with the Wordfast Translation Memory format (*.TXT), and supports text segmentation.	GPLv3	2.01.131b
AutoText - EmotiKons	Provides the EmotiKons icon set as autotext in OpenOffice.org Writer.	LGPLv2.1	0.1.0
AutoTextList2	List AutoText entries to a writer document	GPLv2+	2.0.3
Barcode	Generate UPC-A, EAN-13, ISBN and IAN barcode in Draw	GPLv3	1.3.1
BasicTextList2	Extension to the basic list style		
Batch2PDF	Export a batch of documents to PDF		
BorderLiner	Draw borders with a couple of key strokes	GPLv3	2.1.1
ca_hyph	Catalan hyphenation patterns for OpenOffice.org / Diccionari català de partició de mots per a OpenOffice.org (Note: Lacks a copy of the license in the package.)	GPLv3	0.9.3

No Connection to the Admin!

MySQL Connector for OpenOffice.org
by Oracle
The MySQL Connector for OpenOffice.org installs a native MySQL database driver. It is faster, seamless integrated, easier to administrate and there is no need to install and setup a JDBC or ODBC driver separately. It was never easier to use MySQL databases in OpenOffice.org Base.

Version: 1.0.1 **Date:** 2011-Jan-05 **License:** Opensource

Current Status

The screenshot shows the LibreOffice Extension Center interface. At the top, there is a language selection bar with links for Chinese (中文), Danish (Dansk), English (English), French (Français), German (Deutsch), Hungarian (Magyar), Italian (Italiano), Japanese (日本), Portuguese (Português), Russian (Русский), and Spanish (Español). There are also 'Log In' and 'Register' buttons. Below the header, the LibreOffice logo and 'EXTENSIONS' are displayed. A search bar with a 'Search' button and a checkbox for 'only in current section' is present. The main navigation menu includes 'Home' and 'Extension Center', with 'Extension Center' being the active tab. A breadcrumb trail indicates the current location: Home > Extension Center > TexMaths. On the left, there are links for 'TexMaths' and 'Releases'. The main content area is titled 'TexMaths' and describes it as a 'LaTeX equation editor for LibreOffice'. It includes a 'Project Description' section with a note about LaTeX support, a 'Like' and 'Dislike' button (both at 0), and a large blue pi symbol icon. Below this, a large orange banner reads 'Extension-Project-View'. Underneath, there is a list of project requirements with checkboxes: 'Unit tests' (unchecked), 'End-user documentation' (checked), 'Internal documentation (documentation, interfaces, etc.)' (unchecked), 'Existed and maintained for at least 6 months' (unchecked), 'Installs and uninstalls cleanly' (unchecked), and 'Code structure follows best practice' (unchecked). A 'Current Release' section highlights 'TexMaths 0.29' (released Oct 13, 2011) and notes a fix for a bug related to LibreOffice 3.3.3. A 'Get TexMaths for All platforms' button is at the bottom.

Current Status

The screenshot shows the LibreOffice Extension Center website. At the top, there is a language selection bar with links for Chinese, Danish, English, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Portuguese, Russian, and Spanish. To the right of the language bar are 'Log in' and 'Register' buttons. Below the language bar is the LibreOffice logo and the word 'EXTENSIONS'. On the left, there is a sidebar with links for 'Home' (which is currently selected), 'Extension Center' (which is highlighted in green), 'TexMaths', and 'Releases'. The main content area displays the 'TexMaths 0.29 (Oct 13, 2011)' release page. It includes a brief description of the fix for a bug in LibreOffice 3.3.3, a large mathematical pi symbol, and a link to the overview page. Below this is a section titled 'Available downloads' with a download link for 'TexMaths-0.29.oxt'. A prominent orange banner at the bottom is titled 'Extension-Release-View'.

Technology behind the scene

The screenshot shows the homepage of the Plone CMS website. At the top, there is a navigation bar with links for Home, Download & Extend, Documentation, Support, and Providers. The 'Home' link is highlighted in green. A large orange banner across the top right reads 'CMS Plone'. Below the banner, the text 'Plone 4: Speed, Power & Beauty' is displayed, followed by a brief announcement about Plone 4. A large orange button labeled 'Buildout' is prominently featured. To the right of the text, there is a decorative background image of dandelion seeds. On the left side, there is a sidebar with the text 'The New Plone 4: Speed, Power and Beauty'. In the center, there is another orange box containing the word 'Zeosever'. At the bottom, there is a footer section with news and upcoming events.

The screenshot shows the Plone Software Center homepage. At the top, there is a navigation bar with links for Home, Download & Extend (highlighted in green), Documentation, Get Involved, Plone Foundation, Support, Providers, and Log in. A search bar is also present. Below the navigation, there is a large orange banner with the text "Plone Software Center". To the left of the banner, there is a logo of a white cube with a blue circular icon on it. To the right, there is a green sidebar with the text "Add-on Product" and "Plone site with additional functionality. Currently there are 1690 projects with 5522 releases available." There is also a link to "Submit your Add-on". In the center, there is a "Download Plone" button with icons for Windows, Linux, and Mac OS X. Below this, there is a section titled "Add-on Product Releases" with dropdown menus for "All categories", "Plone 4.1", "Sort On", and "Highest Rated". A search bar and a "Search" button are also present. The message "23 projects matching your criteria." is displayed. At the bottom, there is a link to "Dexterity (plone.app.dexterity)". On the right side, there is a sidebar titled "Browse Add-on Product by Category" with links to "Auth and User Management", "Basic content types", "Buildout", and "Commerce".

Technology behind the scene

At the top, there is a language navigation bar with links for Chinese, Danish, English, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Portuguese, Russian, and Spanish. To the right of the language bar are 'Log in' and 'Register' buttons. Below the language bar is the LibreOffice logo and the word 'EXTENSIONS'. On the right side of the header is a search bar with a placeholder 'Search Site', a checked checkbox for 'only in current section', and a 'Search' button. The main navigation menu includes 'Home' and 'Extension Center'. A breadcrumb trail indicates the user is at 'Home > Extension Center'. The main title 'LibreOffice Extensions Center' is prominently displayed in a large orange banner. Below the title, a green box contains the text 'Extensions extend your LibreOffice with additional functionality.' A large orange banner below the title says 'Customized Plone Software Center'. On the left, there is a card for the 'Copy only visible cells' extension, showing a screenshot of the extension's interface and its compatibility with LibreOffice 3.3 and 3.4. On the right, there is a 'Browse Extension by Category' sidebar with links to 'Calc Extensions', 'Presentation Extensions', 'Language Tools', 'Dictionaries', and 'Writer Extensions'. A large orange banner in the center says 'Two Plone Sites'.

Default Metadata

Title ■ Extension Center

Description
Description for the software center.
This is a place to provide extensions for LibreOffice which are all published under a free license.

Format

Classifiers
Define the Trove classifiers. The format is 'Id | Title | Trove id'. The Id must be unique, and Trove id corresponds to the Trove value

```
1-planning|1 - Planning|Development Status :: 1 - Planning  
2-pre-alpha|2 - Pre-Alpha|Development Status :: 2 - Pre-Alpha  
3-alpha|3 - Alpha|Development Status :: 3 - Alpha  
4-beta|4 - Beta|Development Status :: 4 - Beta  
5-production/stable|5 - Production/Stable|Development Status :: 5 - Production/Stable  
6-mature|6 - Mature|Development Status :: 6 - Mature  
7-inactive|7 - Inactive|Development Status :: 7 - Inactive
```

Use Classifiers to display Categories (with Topic :: *).

Indicate whether the Software Center uses the Classifiers field to display projects. In that case it gets all lines starting with 'Topic' and builds the category list with them.

Categories
Define the available categories for classifying the projects. The format is Short Name | Long name | Description. The id must be unique.

```
All modules | Extensions for all program modules | Extensions that could be used with all program modules.  
Gallery Contents | Gallery Contents for all program modules | Pictures, Backgrounds etc.  
Language Tools | Language Tools for all program modules | Dictionaries and similar  
Dictionary | Dictionaries of different languages for all program modules | Dictionaries of different languages  
Writer_Extension | Writer-Extensions | Extensions that could be used to extend the word processor module.  
Calc_Extension | Calc-Extensions | Extensions that could be used to extend the spreadsheet program module.  
Impress_Extension | Impress-Extensions | Extensions that could be used to extend the presentation program module.
```

Available licenses
Define the available licenses for software releases. The format is Short Name | Title | URL.
