Who is this book for?

Anyone who wants to get up to speed quickly with LibreOffice Writer will find this book valuable. You may be new to word processing software, or you may be familiar with another office suite.

What's in this book?

This book introduces some of the main features of Writer, the word processor component of LibreOffice, and provide instructions for their use.

Part 1: Essentials

- 1 Introducing Writer
- 2 Working with Text: Basics
- 3 Working with Text: Advanced
- 4 Formatting Text
- 5 Formatting Pages: Basics
- 6 Formatting Pages: Advanced
- 7 Printing, Exporting, Emailing
- 8 Introduction to Styles
- 9 Working with Styles
- 10 Working with Templates
- 11 Images and Graphics

Part 2: Extras

- 12 Lists: Tips and Tricks
- 13 Tables
- 14 Mail Merge
- 15 Tables of Contents, Indexes, Bibliographies
- 16 Master Documents
- 17 Fields
- 18 Forms
- 19 Spreadsheets, Charts, other Objects
- 20 Setting up Writer
- 21 Customizing Writer

Minimum requirements for using LibreOffice 5.4

For a detailed list of requirements and operating systems supported, see the LibreOffice website, <https://www.libreoffice.org/get-help/system-requirements/>

How to get LibreOffice

Versions of LibreOffice for Windows, Linux, and MacOS can be downloaded free from <https://www.libreoffice.org/download>. Linux users will also find LibreOffice included free in many of the latest distributions. MacOS users can also purchase LibreOffice Vanilla from the App Store.

Portable and other versions of LibreOffice are listed on the download page. Linux, Vanilla, and other versions may differ in a few features from the descriptions in this book.

Installing LibreOffice

Information on installing and setting up LibreOffice on the various supported operating systems is given here: <https://www.libreoffice.org/get-help/install-howto/>

Setting up and customizing LibreOffice

You can change the default settings (options) in LibreOffice to suit your preferences. To change settings, go to **Tools > Options** on the Menu bar. Settings are described in the Help and in Chapter 2, Setting up LibreOffice, in the *Getting Started Guide*. Some settings of particular interest to users of Writer are covered in Chapter 20, Setting up Writer, in this book.

Tip

Many settings are intended for power users and programmers. If you don't understand what an option does, we recommend leaving it on the default setting unless instructions in this book recommend changing the setting.

You can customize menus, toolbars, and keyboard shortcuts in LibreOffice, add new menus and toolbars, and assign macros to events. See Chapter 21, Customizing Writer, for details.

Extensions and add-ons

You can add functionality to LibreOffice with extensions and add-ons. Several extensions are installed with the program and you can get others from the official extensions repository, <https://extensions.libreoffice.org/> and from other sources. See Chapter 21, Customizing Writer, for more information on installing extensions and add-ons.

Where to get more help

This book, the other LibreOffice user guides, the built-in Help system, and user support systems assume that you are familiar with your computer and basic functions such as starting a program, opening and saving files.

Help system

LibreOffice comes with an extensive Help system. This is your first line of support. The Help is available both online and offline. Windows and Linux users can choose to download and install the offline Help for use when not connected to the Internet; the offline Help is installed with the program on MacOS.

To display the Help system, press *F1* or select **LibreOffice Help** from the Help menu. If you do not have the offline help installed on your computer, your default browser will open a page on the LibreOffice wiki.

For quick tips, place the mouse pointer over any of the icons to see a small box (“tooltip”) with a brief explanation of the icon’s function. For a more detailed explanation, select **Help > What's This?** and hold the pointer over the icon. In addition, you can activate Extended Tips using **Tools > Options > LibreOffice > General**.

Free online support

The LibreOffice community not only develops software, but provides free, volunteer-based support. See Table 1 and this web page: <https://www.libreoffice.org/get-help/>

For comprehensive online support from the community, look at mailing lists and the Ask LibreOffice website, <https://ask.libreoffice.org/en/questions/>. Other websites run by users also offer free tips and tutorials.

Table 1: Free support for LibreOffice users

FAQs	Answers to frequently asked questions https://wiki.documentfoundation.org/Faq
Mailing lists	Free community support is provided by a network of experienced users https://www.libreoffice.org/get-help/mailling-lists/
Native language support	The LibreOffice website in various languages https://www.libreoffice.org/community/nlc/ Mailing lists for native languages https://wiki.documentfoundation.org/Local_Mailing_Lists Information about social networking https://wiki.documentfoundation.org/Website/Web_Sites_services
Accessibility options	Information about available accessibility options. https://www.libreoffice.org/get-help/accessibility/

Paid support and training

You can also pay for support through service contracts from a vendor or consulting firm specializing in LibreOffice. For information about certified professional support, see The Document Foundation's website: <https://www.documentfoundation.org/gethelp/support/>

What you see may be different

Illustrations

LibreOffice runs on Windows, Linux, and MacOS operating systems, each of which has several versions and can be customized by users (fonts, colors, themes, window managers). The illustrations in this guide were taken from a variety of computers and operating systems. Therefore, some illustrations will not look exactly like what you see on your computer display.

Also, some of the dialogs may be different because of the settings selected in LibreOffice. You can use dialogs either from your computer's operating system or from LibreOffice. The differences affect mainly Open, Save, and Print dialogs. To change which dialogs are used, go to **Tools > Options > LibreOffice > General** and select or deselect the option **Use LibreOffice dialogs**.

Icons

The LibreOffice community has created icons for several icon sets: Breeze, Galaxy, High Contrast, Oxygen, Sifr, and Tango. Each user can select a preferred set. The icons in this guide have been taken from a variety of LibreOffice installations that use different sets of icons. The icons for some of the many tools available in LibreOffice may then differ from the ones used in this guide.

To change the icon set used, go to **Tools > Options > LibreOffice > View**. In the **User Interface** section, choose from the drop-down lists under **Icon size and style**.

Note

Some Linux distributions, for example Ubuntu, include LibreOffice as part of the installation and may not include all the icon sets mentioned above. You should be able to download other icon sets from the software repository for your Linux distribution if you wish to use them.

Using LibreOffice on a Mac

Some keystrokes and menu items are different on a Mac from those used in Windows and Linux. The table below gives some common substitutions for the instructions in this chapter. For a more detailed list, see the application Help.

<i>Windows or Linux</i>	<i>Mac equivalent</i>	<i>Effect</i>
Tools > Options menu selection	LibreOffice > Preferences	Access setup options
<i>Right-click</i>	<i>Control+click</i> and/or <i>right-click</i> depending on computer setup	Opens a context menu
<i>Ctrl (Control)</i>	⌘ (<i>Command</i>)	Used with other keys
<i>F5</i>	<i>Shift+⌘+F5</i>	Open the Navigator
<i>F11</i>	⌘+T	Open the Styles and Formatting window

What are all these things called?

The terms used in LibreOffice for most parts of the user interface (the parts of the program you see and use, in contrast to the behind-the-scenes code that actually makes it work) are the same as for most other programs.

A dialog is a special type of window. Its purpose is to inform you of something, or request input from you, or both. It provides controls for you to specify how to carry out an action. The technical names for common controls are shown in Figure 1. In most cases the technical terms are not used in this book, but the Help and other sources of information often use them.

- 1) Tabbed page (not strictly speaking a control).
- 2) Radio buttons (only one can be selected at a time).
- 3) Checkbox (more than one can be selected at a time).
- 4) Spin box (click the up and down arrows to change the number shown in the text box next to it, or type in the text box).
- 5) Thumbnail or preview.
- 6) Drop-down list from which to select an item.
- 7) Push buttons.

In most cases, you can interact only with the dialog (not the document itself) as long as the dialog remains open. When you close the dialog (usually, clicking **OK** or a similar button saves your changes and closes the dialog; clicking **Cancel** closes the dialog without saving any changes), then you can again work with the document.

Some dialogs can be left open as you work, so you can switch back and forth between the dialog and your document. An example of this type is the Find & Replace dialog.

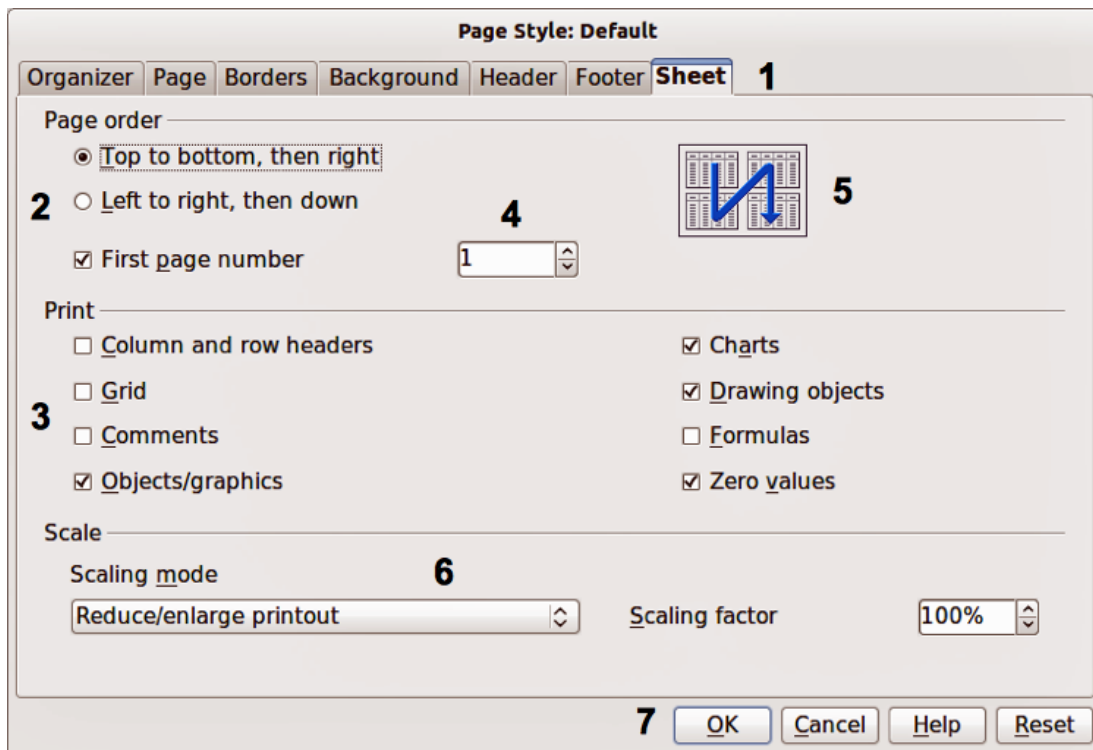

Figure 1: Dialog (from LibreOffice Calc) showing common controls

Who wrote this book?

This book was written by volunteers from the LibreOffice community. You can contribute to writing this and other guides. Profits from sales of the printed edition will be used to benefit the community.

Acknowledgements

This book is updated from previous versions of the *LibreOffice Writer Guide*. Contributors to the earlier versions are:

John A Smith	Jean Hollis Weber	Peter Schofield
Hazel Russman	Leo Moons	David Blymire
Jeremy Cartwright	John M. Długosz	Barbara Duprey
Jamie Eby	Ron Faile Jr.	Gary Schnabl
Klaus-Jürgen Weghorn	Rafael Atias	Preston Manning Bernstein

This book was adapted from the *OpenOffice.org 3.3 Writer Guide*. Contributors to that book were:

Jean Hollis Weber	Michele Zarri	Gary Schnabl	Magnus Adielsson
Agnes Belzunce	Ken Byars	Bruce Byfield	Daniel Carrera
Dick Detwiler	Alexander Noël Dunne	Laurent Duperval	Martin Fox
Katharina Greif	Tara Hess	Peter Hillier-Brook	Lou Iorio
John Kane	Rachel Kartch	Stefan A. Keel	Jared Kobos
Michael Kotsarinis	Sigrid Kronenberger	Peter Kupfer	Ian Laurenson
Alan Madden	Paul Miller	Vincenzo Ponzi	Scott Rhoades
Carol Roberts	Iain Roberts	Joe Sellman	Robert Scott
Janet M. Swisher	Barbara M. Tobias	Catherine Waterman	Sharon Whiston
Bob Wickham	Claire Wood	Linda Worthington	

Frequently asked questions

How is LibreOffice licensed?

LibreOffice 5.2 is distributed under the Open Source Initiative (OSI) approved Mozilla Public License (MPL). See <https://www.libreoffice.org/about-us/licenses/>

It is based on code from Apache OpenOffice made available under the Apache License 2.0 but also includes software that differs from version to version under a variety of other Open Source licenses. New code is available under LGPL 3.0 and MPL 2.0.

May I distribute LibreOffice to anyone? May I sell it? May I use it in my business?

Yes.

How many computers may I install it on?

As many as you like.

Is LibreOffice available in my language?

LibreOffice has been translated (localized) into over 40 languages, so your language probably is supported. Additionally, over 70 *spelling*, *hyphenation*, and *thesaurus* dictionaries for languages and dialects that do not have a localized program interface are available from the LibreOffice website at www.libreoffice.org.

How can you make it for free?

LibreOffice is developed and maintained by volunteers and has the backing of several organizations.

How can I contribute to LibreOffice?

You can help with the development and user support of LibreOffice in many ways, and you do not need to be a programmer. To start, check out this web page:

<https://www.libreoffice.org/community/get-involved/>

May I distribute the PDF of this book, or print and sell copies?

Yes, as long as you meet the requirements of one of the licenses in the copyright statement at the beginning of this book. You do not have to request special permission. We request that you share with the project some of the profits you make from sales of books, in consideration of all the work we have put into producing them.
