- » Free to use and share

END USERS

Writer has all the features you need from a modern, full-featured word processing tool. It's simple enough for a quick memo, and powerful enough for complete books with contents, diagrams and indexes.

Calc is the spreadsheet program you've always needed. It's intuitive, easy to learn for newcomers, robust, and rich in features and functions for professional number crunchers and data miners.

Impress is a professional program for creating multimedia presentations, which can be enhanced with 2D and 3D clip art, transition styles, special effects, high-impact drawing tools and animations.

Draw lets you produce anything from a quick sketch to a complex plan, to communicate with graphics and diagrams. With a maximum page size of 300 by 300 cm, it's a superb package for technical drawings and posters.

Base is a desktop database that's designed to meet the needs of most users, and can also be used as a front end to most enterprise-class databases.

Chart is a business graphics module, integrated with Calc and Impress, which lets you create histograms, pie charts and other visual representations of data.

Math is LibreOffice's formula editor and can be used to insert mathematical and scientific formulas into items such as spreadsheets, text documents, presentations and drawings.

LibreOffice comes with an open, documented and completely scriptable API. LibreOffice supports several scripting languages such as BASIC, Python and PHP, for administrators and developers.
