Chapter 12
User Interface Variants
Using LibreOffice on macOS

Some keystrokes and menu items are different on macOS from those used in Windows and Linux. The table below gives some common substitutions for the instructions in this document. For a detailed list, see the application Help.

<table>
<thead>
<tr>
<th>Windows or Linux</th>
<th>macOS equivalent</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tools &gt; Options</td>
<td>LibreOffice &gt; Preferences</td>
<td>Access setup options</td>
</tr>
<tr>
<td>menu selection</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Right-click</td>
<td>Control+click or right-click depending on computer setup</td>
<td>Open a context menu</td>
</tr>
<tr>
<td>Ctrl (Control)</td>
<td>⌘ (Command)</td>
<td>Used with other keys</td>
</tr>
<tr>
<td>F11</td>
<td>⌘+T</td>
<td>Open the Styles deck in the Sidebar</td>
</tr>
</tbody>
</table>

**Introduction**

By default, commands and tools used in LibreOffice Draw are grouped in a user interface consisting of cascading menus and toolbars. The functions and use of these cascading menus and toolbars are described in previous chapters of this user guide.

This chapter describes the user interface variants that are available for LibreOffice Draw. A user then has the option to select the user interface that suits their requirements and methods of creating drawings in LibreOffice Draw.

---

**Note**

When changing the user interface, the variant can be applied only to LibreOffice Draw, or applied to all the modules in LibreOffice.

---

**Selecting user interface**

To select a user interface variant or switching between the user interface variants:

1) Go to **View > User Interface** on the Menu bar to open the Select Your Preferred User Interface dialog (Figure 1).

2) In **UI variants**, select one of the variants. An example of the selected variant is shown in the **Preview** box, along with a short description.

3) Click on **Apply to Draw** to apply the variant selection to LibreOffice Draw only, or click on **Apply to All** to apply the variant to all the LibreOffice modules. The LibreOffice window changes to match the selected variant.

4) Click **Close** to close the dialog.

---

**Figure 1: Select Your User Preferred User Interface dialog**

---

**Note**

If the option **Enable experimental features** has been selected in the **Tools > Options > Advanced** dialog, several more variants appear in **UI variants**. Being experimental, these variants are not described in this user guide.
In all the user interface variants, the Sidebar can be hidden or shown by clicking on the Hide/Show button on the left of the Sidebar.

Standard Toolbar UI

The Standard Toolbar user interface is the default view when LibreOffice is installed and the Workspace opened for the first time. Figure 2 shows an example of the default Workspace view in LibreOffice Draw, which normally consists of the following.

- Menu bar at the top of the Workspace.
- Standard toolbar positioned below the Menu bar.
- Line and Filling toolbar positioned below the Standard toolbar.
- Drawing toolbar positioned vertically on the left of the Workspace.
- Sidebar positioned on the right of the Workspace.

For more information on the Draw Workspace, see Chapter 1, Introducing Draw.

Tabbed UI

The Tabbed user interface provides a familiar interface for users coming from proprietary office suites, for example Microsoft Office. This user interface is divided into tabs, where each tab displays a set of tools grouped by context. The context changes depending on the object selected and the LibreOffice module being used.

It includes a Menu bar, a Tab bar, and tool icons grouped in context that would be normally used in LibreOffice Draw. If the tool icons on a tab page do not fit into the width of the Draw window, a double chevron >> appears at the right end of the row. Click the double chevron >> to display more commands.
On Windows and Linux operating systems, the Menu bar can be hidden or displayed by clicking on **Menubar** at the left end of the Tab bar.

On the right of the Tab bar, a Quick menu (≡) (Figure 3) is available giving access to some commonly used commands and links. Some of the Quick menu items have submenus, indicated by a triangle ► on the right. The Quick menu is the same for all tabs.

On the left of the Tab bar, an icon bar (Figure 4) is available giving access to some commonly used tools – **Menu bar; Open (Ctrl+O); Save (Ctrl+S); Undo (Ctrl+Z); Redo (Ctrl+Y).**

The Tabbed user interface can be customized using the **Notebookbar** page of the Customize dialog to show or hide the individual tools on the various tabs. For more information on customization of LibreOffice, see the **Getting Started Guide** and the **Writer Guide**.

---

### Note

When using the Tabbed user interface, the Draw toolbars are removed from view. If it is necessary, toolbars can be opened and used by going to **View > Toolbars** on the **Menu bar** or **Quick menu > Toolbars**.

---

### Fixed tabs

The fixed tabs in the **Tabbed** user interface for Draw are described on the following pages. The illustrations show the left and right ends of the tabs separately so they are large enough to more easily see the commands.

#### File tab

The **File** tab (Figure 5) is a fixed tab providing commands to create new documents; open, save, print, and close documents; manage templates; export to PDF and EPUB; display document properties; add a digital signature; and sign an existing PDF.

The **File** tab has two menus (Figures 6 and 7): **File** and **Help**. The **File** tab menu contains the same commands as the tools available on the tab. The **Help** tab menu provides links to a variety of resources.
Figure 5: Tabbed user interface - File tab

Figure 6: File tab menu

Figure 7: Help tab menu

Figure 8: Tabbed user interface - Home tab
Home tab
The Home tab (Figure 8) is a fixed tab providing commands to cut, copy, paste, and format text; insert common items (for example images, tables, charts); apply, update, and edit drawing styles; and so on. The Home tab menu (Figure 9) at the right end of the Tab bar provides additional commands that are not on the tab.

Insert tab
The Insert tab (Figure 10) is a fixed tab providing commands to insert many commonly used items. The Insert tab menu (Figure 11) at the right end of the Tab bar provides some of the same commands.

Figure 9: Home tab menu

Figure 10: Tabbed user interface - Insert tab

Figure 11: Insert tab menu
**Layout tab**

The **Layout** tab (Figure 12) is a fixed tab providing commands to create the drawing page layout. The **Layout** tab menu (Figure 13) provides extra commands to create the drawing page layout.

![Figure 12: Tabbed user interface - Layout tab](image)

**Review tab**

The **Review** tab (Figure 14) is a fixed tab providing commands for spell checking text; inserting and deleting review comments; and redaction. The **Review** tab menu (Figure 15) provides additional text editing commands. Some of these commands appear only if Asian or Complex Text Layout are selected in Tools > Options > Language Settings > Languages.

![Figure 13: Layout tab menu](image)

![Figure 14: Tabbed user interface - Review tab](image)
**View tab**
The View tab (Figure 16) is a fixed tab providing commands for the display of a drawing on screen. The View tab menu (Figure 17) provides additional commands relating to the display on a drawing on screen.

**Extension tab**
The Extension tab (Figure 18) is a fixed tab containing only the command to access the Extension Manager allowing the installation of extensions that are compatible for use in LibreOffice.

![Extension tab](image18)

*Figure 18: Tabbed user interface - Extension tab*

**Tools tab**
The Tools tab (Figure 19) is a fixed tab providing several tools for macros; color replacer; media player; and form creation. The Tools tab menu (Figure 20) provides some of the same commands, plus extra tools for organizing macros and dialogs; image map; data sources; filter settings; extension manager; and options.

![Tools tab](image19)

*Figure 19: Tabbed user interface - Tools tab*

*Figure 20: Tools tab menu*
Additional tabs

Additional tabs appear when an object in Draw is selected and are displayed between the View and Extension tabs. The illustrations show the left and right ends of the tabs separately so they are large enough to more easily see the commands.

Draw tab

The Draw tab (Figure 21) is only available when a draw object is selected in a drawing. It provides commands for editing, transforming, grouping, aligning, and distributing draw objects. The Draw tab menu (Figure 22) provides a similar set of commands for editing, transforming and converting draw objects.

![Figure 21: Tabbed user Interface - Draw tab](image)

![Figure 22: Draw tab menu](image)
**Image tab**

The **Image** tab (Figure 23) only becomes available when an image is selected in a drawing such as a photograph, Fontwork, OLE object, or QR code. It provides commands for working with these images, including captions, cropping, borders and area styles and colors, anchors, wrapping, positioning, and filtering. The **Image** tab menu (Figure 24) provides links to dialogs for working with images.

![Tabbed user interface - Image tab](image1)

*Figure 23: Tabbed user interface - Image tab*

![Image tab menu](image2)

*Figure 24: Image tab menu*

![Tabbed user interface - Object tab](image3)

*Figure 25: Tabbed user interface - Object tab*
**Object tab**
The **Object** tab (Figure 25) only becomes available when an object, such as a chart, is selected. It provides commands to position, resize, choose colors and borders for the selected object. The **Object** tab menu (Figure 26) provides extra commands to match the type of object selected.

![Object tab menu](image)

**Table tab**
The **Table** tab (Figure 27) only becomes available when a table is selected in a drawing. It provides tools to format a table to the drawing requirements. The **Table** tab menu (Figure 28) includes extra commands for editing a table.

![Tabbed user interface - Table tab](image)

**Media tab**
The **Media** tab (Figure 29) only becomes available when a media object is selected in a drawing. It provides commands for positioning and running an audio or video file. The **Media** tab menu (Figure 30) includes extra commands for editing a media object.
Single Toolbar UI & Sidebar UI

When selected, the Single Toolbar and Sidebar user interfaces only show the Menu bar with no toolbars. However, toolbars can be added to either of these user interfaces by going to View > Toolbars on the Menu bar and selecting the required toolbar from the options available. For more information on toolbars, see Appendix B, Toolbars in this guide and the Getting Started Guide.

Tabbed Compact UI

The Tabbed Compact user interface has the same tabs as the Tabbed user interface, but the commands on each tab are arranged as a single row of tools. Some of these tools have drop-down menus with extra options. Figure 31 shows an example of the File tab in the Tabbed Compact user interface.

The tab menu on the right of the Tabbed Compact user interface provides the same options as the tab menus in the Tabbed user interface, see “Tabbed UI” on page 5 for more information.

Groupedbar Compact UI

The Groupedbar Compact user interface (Figure 32), with a Draw object selected, is divided into groups that contain commands organized as sets of tools and menus. Clicking on the double chevron >> displays more tools for editing an object.
The **Groupedbar** menu (Figure 33) on the right-hand end of this interface provides extra commands for working with LibreOffice Draw, including convenient ways to change the user interface and access toolbars.

![Groupedbar user interface with Draw object selected](image)

**Figure 32: Groupedbar user interface with Draw object selected**

**Contextual Single UI**

The **Contextual Single** user interface displays a single toolbar to suit the type of object that has been selected. Figure 34 shows an example of **Contextual Single** user interface when a draw object is selected. Clicking on the double chevron >> displays more tools for editing an object.
