The ultimate quest of bringing Visio support to LibreOffice

ALEXANDRE   14. SEP, 2011   NO COMMENTS

Today LGW's guests are Eilidh McAdam and Fridrich
Strba who implemented support for VSD documents
(Microsoft Visio) in LibreOffice within Google Summer of
Code 2011 program.

PARIS2011
CONFERENCE
12th-15th October

2011-06-16

Cross-compiling LibreOffice to iOS, Android, Windows and PPC MacOSX

Firstly: This is very experimental work in progress, "baby steps". A lot remains to be done.

For iOS and Android there is nothing yet to test on an actual device, emulator (Android) or simulator (iOS). Don't ask to be a "beta tester", there is nothing to beta test. Only people working on actual code can participate at this stage. There are no concrete plans what end-user deliverables, if any, this will result in, or who would offer them. Even if a lot of code actually compiles already, whether it makes any sense at run-time is very unclear.
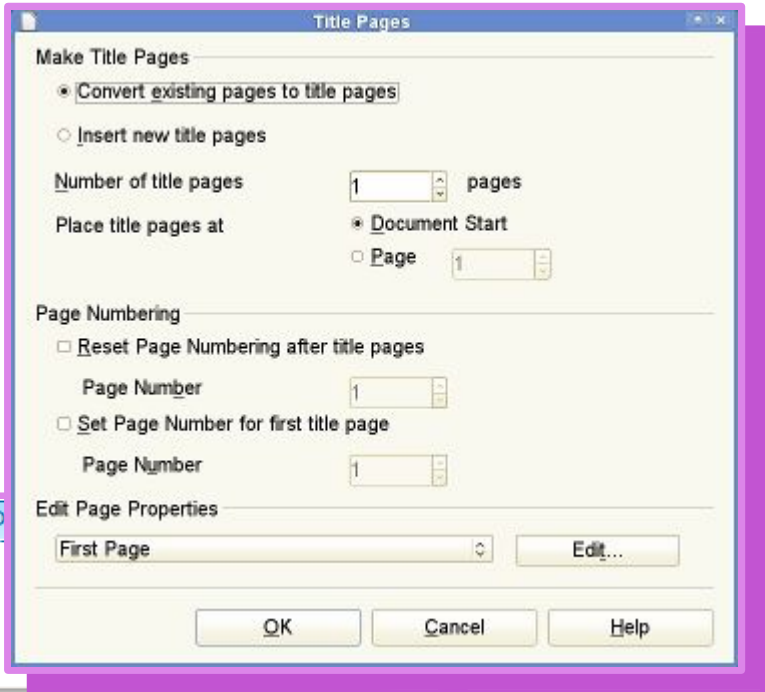

Secondly: I am bypassing all licensing aspects at this stage. I am hacking on at least the iOS and Android aspects just in my own time, for the hacking pleasure. Don't bother adding comments that bring up alleged license incompatibilities with the iTunes App Store, or Android Market, or whatever.

LibreOffice

Why LibreOffice is a success?

- You can join yourself
  - It is stimulated to join yourself
  - It's easy to join
  - Building LibreOffice is (relatively) very easy
  - There are easy hacks and developers supporting quickly
- You can hire experienced companies to do work for you
- You can choose a support contract
- You can help testing your favorite features
- You can help with building your favorite features
  - … and
- Still you can use your favorite office suite for free :-)

LibreOffice

Thanks for your attention!
